

Indiana EMS Education Workgroup

- We are an association of Indiana Primary Instructors.
- Our mission is to promote quality EMS Education in Indiana.
- Our goals
 - Advancement of EMS Education
 - We will be proactive in recognizing hurdles to EMS education and offer possible solutions to the Commission, but we also have to understand that our recommendations may not work for reasons that we do not necessarily know.
 - Curriculum Updates
 - We will strive to be on the cutting edge of EMS and EMS education, which includes staying abreast of local, regional, statewide and national trends and making the EMS education community aware of legislative initiatives that impact EMS.
 - Communication and development of PI knowledge and skills
 - We will support instructors across the state by providing educational opportunities that allow them to develop their EMS and instructor-related knowledge and skills.
 - Assisting the Commission, TAC, and IDHS with education-related work as requested.
 - We will be a competent resource for the various groups tasked with overseeing Indiana EMS and help however we can.
- Membership
 - The Indiana EMS Education Workgroup meetings are open to all persons having an interest in EMS education. Membership in the group will be limited to Indiana certified EMS Primary Instructors. Voting privileges shall be restricted to active members who have attended at least 50% of the meetings in the past floating calendar year.
